

Department: Physical Education

Curriculum Intent Statement

Our Curriculum Vision & Purpose

To develop all pupils' knowledge and understanding of how to lead a healthy, active lifestyle throughout their school life and beyond. All pupils will develop confidence and competence to take responsibility for their own physical health and have an understanding of how to remain physically active throughout their adulthood.

Powerful Knowledge

All pupils will develop their knowledge in the following 4 key areas...

- The importance of a balanced, healthy diet in maintaining health and physical fitness.
- The components of fitness that underpin performance in all physical activity and sport.
- How the body systems allow us to move in order to take part in physical activity and sport – including the skeletal, muscular, cardiovascular and respiratory systems.
- How the development of their own Physical Literacy (a knowledge and skills base that allows people to adapt to everyday life situations) will allow them to lead a healthy, active lifestyle.

Curriculum Features

- Practical activities offered provide a range of experiences as well as underpinning the examination PE syllabuses (GCSE PE and BTEC Sport).
- A sequential approach is used to ensure that knowledge and skill development in practical activities is built upon year on year, through KS3 and into KS4.
- Focus on development of skills in isolation and then progression to using these skills in competitive, dynamic situations.
- A coherent approach to curriculum planning enables the theory element of PE to be taught throughout KS3, to develop in students a powerful knowledge of the key principles that underpin practical performance.
- Pupils are provided with opportunities for progression through the extra-curricular programme and competitive inter-school competitions.

Continuous Development Cycle

Curriculum Knowledge & Assessment Overview 2021-23

	Term / Duration	Topic & Main Content Overview	Assessment Task/Focus & Objectives	Powerful Knowledge for Year 7 (referenced to topic as appropriate)
Year 7 Scheme Overview	Term 1 8 Weeks Max. No. Lessons: 14	<p>For all activities pupils will explore; skills in isolation, skills in a competitive situation including strategies and tactics and theoretical knowledge.</p> <p>Boys- Rugby and Badminton Girls- Netball and Badminton</p> <p>Rugby isolated skills will include: passing, receiving, tackling and grip/carry</p> <p>Badminton isolated skills will include: serves, overhead clear, net shot and rallying</p> <p>Netball isolated skills will include: passing, marking, dodging, footwork and shooting</p>	<p>Demonstrating basic knowledge and understanding of skills and tactics to use within a game situation.</p> <p>AO1 – Knowledge and understanding of factors that affect performance & involvement</p> <p>AO2 – Apply Knowledge and understanding of the factors that underpin performance and involvement in physical activity and sport.</p> <p>AO4 Demonstrate and apply relevant skills and techniques in physical activity and sport. Analyse and evaluate performance.</p>	<ul style="list-style-type: none"> The components of fitness that underpin performance in all physical activity and sport. How the body systems allow us to move in order to take part in physical activity and sport – including the skeletal, muscular, cardiovascular and respiratory systems. Activity specific vocabulary
	Term 2 7 Weeks Max. No. Lessons: 14	<p>For all activities pupils will explore; skills in isolation, skills in a competitive situation including strategies and tactics and theoretical knowledge.</p> <p>Boys- Theory, Basketball and Football Girls- Theory, Dance and Table Tennis</p> <p>Theory- musculoskeletal system, cardiorespiratory system and physical training</p> <p>Basketball isolated skills will include: passing, dribbling, footwork, shooting</p> <p>Football isolated skills will include: passing, control, ball manipulation, shooting, defending</p> <p>Dance isolated skills will include: development of choreography using a choreographic process and replication of physical and interpretative skills.</p>	<p>Multiple-Choice Questions (MCQs) and GCSE style questions relating to topics covered, including skeletal system, muscular system etc.</p> <p>AO1, AO2, AO4</p>	<ul style="list-style-type: none"> The importance of a balanced, healthy diet in maintaining health and physical fitness How the development of their own Physical Literacy (a knowledge and skills base that allows people to adapt to everyday life situations) will allow them to lead a healthy, active lifestyle.

Powerful Knowledge includes key 'invaluable' and distinct knowledge concepts linked to this subject; it is distinct from common sense.

Assessment Format to follow whole-school expectations (MCQs for Content Knowledge & Understanding, GCSE-style Qs. for Application of Skills).

Continuous Development Cycle

Curriculum Knowledge & Assessment Overview 2021-23

		Table Tennis isolated skills will include: grip, serve, pushes and top spin/back spin.		
Term 3 6 Weeks Max. No. Lessons: 12	For all activities pupils will explore; skills in isolation, skills in a competitive situation including strategies and tactics and theoretical knowledge. Boys- Theory, Football and Strength, Conditioning and Fitness (SCF) Girls- Theory, Gymnastics and SCF SCF- Fitness testing, physical training and development of components of fitness Gymnastics isolated skills will include: balance, agilities, rolls, travel and flight. See Term 2 for Football and Theory	Theory lessons will be assessed through MCQ's and GCSE style questions relating to topics covered. AO1, AO2, AO4 and... AO3 - Analyse and evaluate the factors that underpin performance and involvement in physical activity.	<ul style="list-style-type: none"> The importance of a balanced, healthy diet in maintaining health and physical fitness How the development of their own Physical Literacy (a knowledge and skills base that allows people to adapt to everyday life situations) will allow them to lead a healthy, active lifestyle. 	
Term 4 6 Weeks Max. No. Lessons:12	For all activities pupils will explore; skills in isolation, skills in a competitive situation including strategies and tactics and theoretical knowledge. Boys- Dance/Gymnastics and Handball Girls- Basketball and Football/Rugby Handball isolated skills will include: dribbling, shooting, passing, defending and footwork See Term 1/2/3 for Dance, Gymnastics, Basketball, Football and Rugby	Graded by assessment matrix. AO1, AO2, AO4 and... AO3 - Analyse and evaluate the factors that underpin performance and involvement in physical activity.	<ul style="list-style-type: none"> The components of fitness that underpin performance in all physical activity and sport. How the body systems allow us to move in order to take part in physical activity and sport – including the skeletal, muscular, cardiovascular and respiratory systems. Activity specific vocabulary 	
Term 5 6 Weeks Max. No. Lessons: 12	For all activities pupils will explore; skills in isolation, skills in a competitive situation including strategies and tactics and theoretical knowledge. Boys- Cricket and Table Tennis Girls- Rounders and Handball	Graded by assessment matrix. AO1, AO2, AO4	<ul style="list-style-type: none"> The components of fitness that underpin performance in all physical activity and sport. How the body systems allow us to move in order to take part in

Continuous Development Cycle

Curriculum Knowledge & Assessment Overview 2021-23

KS4 Core PE

All pupils will take part in KS4 Core PE with the main focus being on participation, further skill development and promoting a healthy and active lifestyle. Following National Curriculum guidelines, the programme offers breadth and balance covering a variety of activities categorised as:

- Team Sports
- Individual Sports
- Outdoor and Adventurous Activities
- Dance
- Other Competitive Sports

In Years 10 and 11, all pupils will have two lessons per fortnight. Pupils should endeavour to participate in frequent physical activity, establishing good habits and acquiring knowledge to ensure a healthy and active lifestyle. All pupils will develop and build upon skills, tactics and fitness requirements acquired in Key Stage 3. At the start of the year they are given the opportunity to select a 'pathway' that is best suited to their interests – please see the pathways outlined below.

Continuous Development Cycle

Curriculum Knowledge & Assessment Overview 2021-23

	Term / Duration	Topic & Main Content Overview	Assessment Task/Focus & Objectives	Powerful Knowledge for Year 10 (referenced to topic as appropriate)
Year 10 GCSE PE Scheme Overview	Term 1 8 Weeks Max. No. Lessons: 21	<p>Theory – Component 1 Fitness and Body Systems. 1.1.1 – 1.1.11 - The structure and functions of the musculoskeletal system. In this topic, learners will develop knowledge and understanding of the key body systems and how they impact on health, fitness and performance in physical activity and sport.</p> <p>Practical – Component 3 Practical Performance – Badminton and Handball.</p>	<p>Component 1 - AO1 – Knowledge and understanding of factors that affect performance & involvement</p> <p>AO2 – Apply Knowledge and understanding of the factors that underpin performance and involvement in physical activity and sport.</p> <p>AO3 - Analyse and evaluate the factors that underpin performance and involvement in physical activity.</p> <p>Component 3 – AO4 Demonstrate and apply relevant skills and techniques in physical activity and sport. Analyse and evaluate performance.</p> <p>Use of end of topic tests following MCQ's followed by GCSE style questions ranging from 2 marks – 9 marks over the course of the year.</p> <p>Use of do, re-do and review (do part 1, do part 2, re-do 1+2, review/test) over the course of the year, for example unit 1.1.1 – 1.1.11 will be implemented into other end of topic tests to continuously re-cap knowledge.</p>	<p>Functions of the skeleton, classification of bones, structure of the skeleton, classification of joints, movement at joints, role of ligaments and tendons, muscle fibre types, location of muscles, antagonistic muscle pairs, skeletal and muscular systems working together.</p>
	Term 2 7 Weeks Max. No.	<p>Theory – Component 1 Fitness and Body Systems 1.2.1 – 1.2.10 The function and structure of the cardio-respiratory system. 1.3.1-1.3.2 – Anaerobic and aerobic exercise.</p>	<p>Component 1 - AO1</p> <p>AO2</p> <p>AO3.</p> <p>Component 3 – AO4</p>	<p>Functions of the cardiovascular system, structure of the cardiovascular system, structure of arteries, capillaries and veins,</p>

Powerful Knowledge includes key 'invaluable' and distinct knowledge concepts linked to this subject; it is distinct from common sense.

Assessment Format to follow whole-school expectations (MCQs for Content Knowledge & Understanding, GCSE-style Qs. for Application of Skills).

Continuous Development Cycle

Curriculum Knowledge & Assessment Overview 2021-23

<p>Lessons: 21</p>	<p>Practical – Component 3 Practical Performance – Badminton and Handball.</p>		<p>vascular shunting, function of blood and blood vessels, composition of inhaled and exhaled air impacting physical activity, vital capacity and tidal volume, function and structure of the respiratory system, gaseous exchange, how the cardiovascular and respiratory systems work together. Energy, the use of glucose and oxygen, energy sources.</p>
<p>Term 3 6 Weeks Max. No. Lessons: 18</p>	<p>Theory – Component 1 Fitness and Body Systems. 1.4.1-1.4.6 – The short and long term effects of exercise. In this topic, learners will develop knowledge and understanding of the basic principles of movement and their effect on performance in physical activity and sport 2.1.1 – 2.2.4 – Lever Systems, examples of their use in activity and the mechanical advantage they provide in movement, Planes and axes of movement. Practical – Component 3 Practical Performance - Table Tennis and Netball.</p>	<p>Component 1 - AO1 AO2 AO3. Component 3 – AO4</p>	<p>Short-term effects of physical activity on lactate accumulation and fatigue as well as heart rate, stroke volume, cardiac output and breathing rate. How the respiratory and cardiovascular systems work together. Long term effects of exercise on body systems and interpretation of graphs. First, second and third class levers, mechanical advantage and disadvantage.</p>
<p>Term 4 6 Weeks Max. No. Lessons:18</p>	<p>Theory - Component 1 Fitness and Body Systems. 2.1.1 – 2.2.4 – Lever Systems, examples of their use in sport, Planes and axes of movement. In this topic, learners will develop knowledge and understanding of the principles of training and different training methods in order to plan, carry out, monitor and evaluate personal exercise and training programmes 3.1.1 – 3.4.4 – The relationship between health and fitness and the role that exercise plays in both, the components of</p>	<p>Component 1 - AO1 AO2 AO3. Component 3 – AO4</p>	<p>Movement patterns, body planes and axes. Sagittal, vertical and transverse planes. Definitions of fitness, health, exercise and performance, components of fitness.</p>

Powerful Knowledge includes key 'invaluable' and distinct knowledge concepts linked to this subject; it is distinct from common sense.

Assessment Format to follow whole-school expectations (MCQs for Content Knowledge & Understanding, GCSE-style Qs. for Application of Skills).
